DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hitchcock (U.S. Patent Number 2,285,658). Hitchcock discloses that his invention relates to measuring instruments and has particular means to eliminate glare.
- 3. In regard to claim 1, Hitchcock discloses and shows in the figures a housing for a level measurement system, said housing comprising an upper section (8), a lower section (4); said upper and said lower sections being coupled together to define an enclosure for housing electronic circuitry associated with the level measurement system; a reflective coating applied to a least a portion of said upper section, wherein said reflective coating is effective to reflect solar radiation see the abstract whereby the device is said to eliminate glare).

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/663,595 Page 3

Art Unit: 2856

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness

rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

6. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hitchcock.

7. With regard to claim 2 and 3, since the reflective surface is the glass, the locations of the

entire upper section, whereby the glass is the upper portion of the housing, or at least of portion of

the interior, since the glass is both on the interior and exterior of the housing, then these claims are

deemed to be disclosed in view of Hitchcock.

With regard to claims 4 and 5, though the specific method by which the viewing glass is

made reflective is not disclosed, the examiner is taking official notice that the use of a metallic film

or an mirrored finish to make an item reflective would be well within the preview of one of

ordinary skill in the art.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. The examiner has cited various references that are deemed to be relevant to the general

state of the art of the present invention.

Any inquiry concerning this communication or earlier communications from the examiner

should be directed to Rodney T. Frank whose telephone number is (571) 272-2193. The

examiner can normally be reached on M-F 9am -5:30p.m..
